

WE MAKE LIVE EVENT **STREAMING SIMPLE**

Produce your live events and deliver engaging experiences to every screen with our cloud-native SaaS solution.

MAKE YOUR EVENT **A LIVE SUCCESS AT SCALE**

Leverage the agility of our cloud-based streaming platform to deliver your live content with unrivaled video quality on every screen. The flexibility of VOS®360 cloud streaming platform powers even the most complex delivery workflows with ease.

With real-time scaling, and advanced cloud processing your live events are streamed with optimal efficiency end-to-end. Give your subscribers the live experiences they expect, anywhere and on any device, with high-availability.

Expand your audience reach and fully monetize your content with support for dynamic ad insertion. Offer premium content with UHD video for premium live streaming experiences.

Grow your audience & monetize.

Live events can drive massive audiences to the large screen, and it's premium real-estate for advertisers.

Maximize your revenue opportunities with high-value targeted advertising during high-viewership moments.

Live streaming with the in-person feel.

Deliver premium video quality with exceptionally low bitrates for reduced buffering. Our industry-leading EyeQ™ AI-based compression is built in to VOS360.

VOS360 makes watching together possible and powers multiview TV. With advanced encoding and transcoding capabilities for ultra-low latency you can provide the real-life live experiences viewers demand.

Cloud resiliency & multi CDN enabled.

With georedundancy and multi CDN capabilities for seamless switching, you ensure the highest availability and zero perceived impact for your subscribers if an outage occurs.

VOS360 is cloud-native and agnostic to run several instances on the major cloud platforms: Microsoft Azure, AWS and Google Cloud.

VOS360 scales manifest manipulation operations for high-value targeted advertising and dynamic ad insertion.

Guaranteed service uptime & support.

Deliver your live streams with broadcast-grade components, without the heavy hardware investment.

We guarantee service uptime with no more than 5 seconds of downtime per event.

Get dedicated support for mission critical events from our expert event services team at every step of the way, from planning, setup, pre-roll testing, and throughout the entire event.
